Re: Pacific Gas and Electric Company's Proposed Lakeville/Sonoma 115kV Transmission
Line Project, Sonoma County, California

Mr. Couey:

Pacific Gas and Electric Company (PG&E) is conducting a cultural resources assessment for the above referenced project. The project is located in the area extending from the City of Petaluma to the City of Sonoma, north of Hwy 121/116, Sonoma County (see enclosed map). The proposed project entails the improvement of the existing electric transmission system. PG&E will be completing background research and field investigations to document potential cultural resources issues, including possible Native American heritage sites, associated with the proposed project.

We would appreciate any background information you can provide regarding prehistoric, historic and ethnographic land use. We are also interested in any contemporary Native American values that may be present within or near the project. Thank you for assistance on this project, and please feel free to contact me should you have any questions.

Best regards,
Jennifer Lathrop
Cultural Resources Specialist
